## Implementation plan update 2023

### ➤ Reason of an update

According to Art. 9(2) of the Regulation (EU) 913/2010, the Management Board shall periodically review the Implementation Plan. The focus of this update is on:

- Bottleneck analysis and capacity management plan update,
- Setting the corridor objectives with the target values,
- Update of the infrastructure parameters maps,
- Update of the Investment Plan,
- Update of the ERTMS Deployment Plan.

### ➤ Timeline of the Implementation Plan update elaboration

**12.10.2023 – Implementation Plan update sent to stakeholders for consultation**

**26.10.2023 – deadline for consultation**

21.11.2023 - GA approval

13.12.2023 – ExBo approval

**10.01.2024 – publication of the Implementation Plan update**

## C-OSS report about the train cancellation – information about consultation

This year, RFC NS-B would like to share with RUs a C-OSS report on the cancellation of train paths allocated to a freight operation in TT2023.

According to the Regulation Art 14(8), 'a train path may not be cancelled less than 2 months before its scheduled time in the working timetable if the applicant concerned does not give its approval for such cancellation'. The report is part of the deliverables required by CEF for the technical Assistance (TA) funding of all corridors including RFC8.

The RAG members will be asked to complemented the report by their opinion. The distribution date of the report will be communicated in the next weeks.

The report will consist of :

- An evaluation of the compliance of each IM's Network Statement regarding this rule
- A sample selection of 10 PaP trains along RFC NS-B from the periods of 20-26 March 2023 and 4-10 September 2023 and analysis of these regarding cancellations in the respective periods per IM.
- If a path has been cancelled 2 months before its scheduled time, the alternative path proposal by the IM
- Cases in which the requirements could not be met and a justification why it was not possible to fulfil these requirements
